

TaskCom1

Reconfigurable Wired Headset System

Superior Features:

- Quick field set-up
- Talk clearly over 1,000's of feet
- Accommodates up to 30 headsets
- Duplex telephone-like conversation
- Rugged professional grade components
- 3 user-selectable channels on 4-pin cable
- Adapts to existing wiring and connections
- Use in place of voice (sound) powered systems
- Channel selector, mic switch, talk/battery indicator
- Low drain 9-volt alkaline battery powers headset for days
- *An affordable, efficient, flexible, and sturdy communication tool!*

Comfortable to wear. Easy to set up. Simple to use.

TaskCom1 is a unique reconfigurable wired headset intercom system designed for great flexibility in a wide range of applications, such as noisy areas, task communications, and temporary installations.

TaskCom1 requires no central amplifier or power supply because the entire system, which is powered by each headset's battery, operates on 3 user selectable speech channels and uses standard 4-pin telephone extension cord with modular connectors. Adaptable to existing wiring. The system provides duplex telephone-like conversation over many 1,000's of feet of cable and handles many headsets over the same network.

Typical TaskCom System Configuration:

4 KEY SYSTEM COMPONENTS

THEN CHOOSE A HEADSET STYLE

TC-1/20

TC-1/30

TC-1/40

TC-1/50

Unlimited Applications!

- Noisy areas
- Power plants
- Crane rigging
- Printing plants
- Aircraft de-icing
- Production lines
- Road line painting
- Film & video crews
- Plant maintenance
- Testing & calibration
- General construction
- Confined space entry
- Electrical construction
- Temporary installations
- Corrugating machinery
- Sandblasting & pumping
- Pump/straying operations
- Building emergency systems
- Task-oriented communication
- Training & simulation exercises

...and more!
